

Smart NetProtect Managed Protection Service

Real Peace of Mind with Always-Optimized DDoS Protection

PS-NetProtect - Managed Protection Service

Managed Protection Service Overview

Allot's Smart NetProtect Managed Protection Service gives you always-on, expert-driven protection—so your network stays resilient no matter how threats evolve.

Our 24x7 human-led monitoring and optimization ensure your Smart NetProtect deployment is continuously tuned for maximum effectiveness. Allot's Professional Services experts proactively review configurations, analyze traffic and attack patterns, validate mitigation quality, and implement improvements that keep pace with both emerging threats and ongoing network changes. The outcome: consistently optimized DDoS protection and a significantly reduced risk of costly downtime.

Backed by best practices refined through work with Tier 1 telcos worldwide, our team ensures you get the highest level of protection and operational confidence.

Why is it important?

DDoS attacks are escalating rapidly (e.g., hyper-volumetric DDoS attacks often exceed 1 Tbps) and continue to grow as organizations accelerate their digital transformation. DDoS and Botnet attacks can have serious consequences, such as shutting down your services or serving as a conduit for unauthorized access to critical data.

The major concerns behind these attacks are their dynamic nature, the relatively low effort required to launch them, and the enormous damage and revenue loss they can impose on your organization.

The Managed Protection Service provides you with real peace of mind against DDoS attacks. We take full responsibility for your DDoS protection, ensuring your Smart NetProtect is always on and well configured to detect evolving threats.

For whom is this service relevant?

The service is highly recommended, especially for those Service Providers faced with these common scenarios:

- Your IT team lacks domain expertise in the area of DDoS attacks, to get the maximum out of your Smart NetProtect.
- You experienced some new and harmful DDoS attacks.
- You believe that 24x7 monitoring of your Smart NetProtect solution can improve the protection of your network and business against DDoS attacks.

What's in it for you?

Safeguard your business resilience and reputation

Allot Smart NetProtect Managed Protection Service ensures the solution is always configured to protect your network effectively and consistently against today's and future threats.

Peace of mind to focus on what matters most

With 24x7 expert monitoring and optimization, Smart NetProtect keeps your network protected and your team free to focus on strategic priorities.

Minimize revenue loss due to network downtime

Allot Smart NetProtect stops attacks at rates up to terabits per second. Thanks to 24x7 ongoing monitoring, you significantly reduce the risk of network downtime and the resulting revenue loss.
