Enterprises

Protect the Unprotected.

- Drive increased revenue and customer satisfaction through network-based security-as-a-service.
- Protect local, national and enterprise networks against botnet and volumetric DDoS attacks.
- Understand exactly what's happening in your network through granular analytics.
- Assure optimized performance for mission critical applications, network utilization, and customer digital experience, via traffic control and shaping.
- Comply with government regulations for safe Internet activity.
- Reduce OPEX and CAPEX via closed loop automation and fully cloud-based or NFV compliant deployments.

Track Record

Allot's multi-service platforms are deployed by over 500 mobile, fixed, and cloud service providers and over 1000 enterprises from various industry verticals.

Our industry leading network-based Security as a Service solution is already used by many millions of subscribers.

Enhanced Customer Experience

Allot solutions work with network, application, usage and security data to enhance the experience of your customers making your service smarter and more secure.
