

Maximize the Power of Smart NetProtect with Quarterly Expert Audits

PS-NetProtect - Quarterly Audit Service

Quarterly Audit Service Overview

Allot's Smart NetProtect Quarterly Audit Service is your fast track to stronger, more reliable business resilience. Every quarter, our experts review your Smart NetProtect deployment to ensure your defenses stay ahead of evolving traffic trends and attack techniques, so your network is always prepared, always optimized, and always protected.

Backed by Allot's world-class Professional Services team and decades of experience supporting Tier-1 operators globally, this service transforms your Smart NetProtect deployment into a continuously improving asset that delivers measurable protection value quarter after quarter.

Why is it important?

DDoS attacks are escalating rapidly (e.g., hyper-volumetric DDoS attacks often exceed 1 Tbps) and continue to grow as organizations accelerate their digital transformation. DDoS and

Botnet attacks can have serious consequences, such as shutting down your services or serving as a conduit for unauthorized access to critical data.

The major concerns behind these attacks are their dynamic nature, the relatively low effort required to launch them, and the enormous damage and revenue loss they can impose on your organization.

With the Quarterly Audit, you get proactive, expert-driven optimization recommendations designed to keep you one step ahead.

Our team reviews and recommends, targeted configuration enhancements to ensure your Smart NetProtect deployment delivers maximum effectiveness as your business, your traffic, and your threat landscape change.

This high-value, cost-effective service is ideal if:

- Your network has evolved, through technology upgrades, cloud migration, or expanded online services
- New IT staff have joined and need deeper familiarity with Smart NetProtect
- You've experienced new or damaging DDoS attacks
- You want to extract more protection, performance, and ROI from your Smart NetProtect solution

What You Gain?

- Uninterrupted business resilience
- Keep your services running and your reputation strong with ongoing expert tuning that ensures Smart NetProtect consistently delivers top-tier protection.
- A more knowledgeable, empowered IT team
- Each audit becomes a mini-training session. Your team learns about emerging attack trends and gains hands-on insight into how to configure Smart NetProtect for maximum, ongoing impact.
- Reduced downtime and minimized revenue loss
- With mitigation power reaching terabit-scale, Smart NetProtect is built for extreme defense. Our quarterly audits ensure you're tapping into the full force of that capability, dramatically lowering your exposure to costly outages.
